## **Data Flow Diagrams:**

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

**User Stories** 

Use the below template to list all the user stories for the product.

| User Type              | Functional<br>Requirement<br>(Epic) | User<br>Story<br>Number | User Story / Task   | Acceptance criteria   | Priority | Release  |
|------------------------|-------------------------------------|-------------------------|---|---|----------|----------|
| Customer<br>(Web user) | Registration                        | USN-1                   | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard   | High     | Sprint-1 |
|                        |                                     | USN-2                   | As a user, I can register for the application through E-mail.   | I can access my account / dashboard   | Medium   | Sprint-1 |
|                        | Confirmation                        | USN-3                   | As a user, I will receive confirmation email once I have registered for the application.                  | I can get a confirmation for my email and password and create an authenticated account. | Medium   | Sprint-1 |
|                        | Login                               | USN-4                   | As a user, I can log into the application by entering the registered email & password.                    | I can log onto the application with the verified email and password                     | High     | Sprint-1 |
|                        | Dashboard                           | USN-5                   | As a user, I can view the products which are available.   | Once I log on to the application, I can view the inventory.                             | High     | Sprint-2 |

| User Type | Functional<br>Requirement<br>(Epic) | User<br>Story<br>Number | User Story / Task   | Acceptance criteria  | Priority | Release  |
|-----------|-------------------------------------|-------------------------|---|--|----------|----------|
|           | Stock Update                        | USN-6                   | As a user, I can add products which are not available in the dashboard to the stock list.                       | •  | Medium   | Sprint-2 |
|           | Sales<br>Prediction                 | USN-7                   | As a user, I can get access to a sales prediction tool which will help me to better predict the order quantity. | The sales prediction tool should forecast the sales so that I, as a User, can order appropriately.             | Medium   | Sprint-3 |
| (         | Request to Customer Care            | USN-8                   | As a user, I am able to get in touch with the Administrator and ask for whatever services I require help with.  | As a user, I can contact Customer Care and get support from them.  | Low      | Sprint-4 |
|           | Give feedback                       | USN-9                   | I should be able to report any difficulties I experience as a report.   | As user, I can give<br>my support in my<br>possible ways to the<br>administrator and to<br>the administration. | Medium   | Sprint-4 |
